

Invitation Letter

Dear attendees and colleagues,

DVCon China 2025 will be held from April 16, 2025 in Shanghai, China. On behalf of the chair of this conference, it is my honor to extend a formal invitation to you to attend the DVCon China 2025. It's exciting to gather together and discuss the latest trends and cutting-edge technologies in the field of design verification.

In recent years, we've seen tremendous growth in China's chip development across various sectors, particularly in critical areas like CPUs, GPUs, artificial intelligence, automotive electronics, communications, and the Internet of Things (IoT). It's inspiring to witness the rapid rise of domestic companies in these fields, which not only drives technological advancement but also enhances our overall market competitiveness.

As we continue to accelerate chip development, our community of design verification engineers is expanding at an impressive pace. More talented engineers are joining our ranks, bringing fresh perspectives and innovations that are vital to our industry's progress. Design verification is not just about ensuring product quality; it's also key to improve our overall research and development efficiency.

While we strive for speed and efficiency, we must also emphasize creativity and innovation. Whether it's through developing new tools and processes or creatively solving challenges in our engineering projects, the contributions of design verification engineers are crucial. It's through our commitment to continuous innovation that we can stay competitive in this fast-paced market.

Every year, the DVCon China Conference attracts hundreds of engineers from leading companies across the country. This gathering is not only about learning and sharing knowledge, but it's also a fantastic opportunity to connect and network with fellow professionals. I encourage you to take advantage of this platform to explore the latest features of IC tools, discover new solutions, and make new friends in the industry. I hope you leave this conference with valuable insights that will benefit you both technically and personally.

We sincerely hope that you accept our invitation to attend the DVCon China 2025 and have an enriching and exciting conference experience together!

Thank you!

Bin Liu
DVCon China 2025 General Chair
